22 years Sofia, Bulgaria

Experience

Database Developer July 2023 – now

eDynamix Bulgaria Ltd

- **SQL Server Development:** Designed, implemented and optimized complex stored procedures, functions to enhance database performance and ensure data integrity.
- **Database Design & Optimization:** Created new tables, views, and indexes to support new application features and improve query performance.
- **Problem Solving:** Identified and resolved performance bottlenecks, optimized queries, and addressed production issues in a timely manner.
- **SSRS Reporting:** Developed and maintained SSRS reports, providing critical business insights through data visualization and reporting solutions.
- **Version Control (Git):** Managed and tracked changes in database objects using Git version control, ensuring a consistent and reliable codebase.

Intern Java Developer July 2022 – November 2022

Infinno LLC

- **Java Development:** focusing on OOP principles, Data structures and algorithms to enhance code reusability and maintainability.
- Worked extensively with **JDBC** to establish secure and efficient connections between **Java** applications and **MySQL** databases.
- Designed and implemented **SQL** queries to manage and retrieve data from the **MySQL** database, optimizing performance.

Education

Plovdiv university "Paisii Hilendarski" - 4th year student **Informatics**

School of Maths and Science "Geo Milev", Stara Zagora - Secondary education **Informatics**
